

## Press Release

### **European Network of Transmission System Operators for Gas publishes the System Development Map 2014 in cooperation with Gas Infrastructure Europe.**

(Brussels, 20 July 2015, PR0092-15) The European Network of Transmission System Operators for Gas (ENTSOG), in cooperation with Gas Infrastructure Europe (GIE), has published the fifth edition of the map illustrating the development of gas supply, demand and infrastructure over 2014 and the first quarter of 2015.

The layout improvements implemented in the last edition have been welcomed. Keeping the same format this new edition makes the analysis of the evolution of demand, supply and infrastructure easier for the readers.

Vittorio Musazzi, ENTSOG General Manager, said, *“This fifth edition of the System Development Map continues with ENTSOG effort to provide information on the physical aspects of the European gas market in a transparent and user-friendly way.”*

Thierry Deschuyteneer, GIE Executive Secretary, said: *“Infrastructure operators are committed to offer useful information to stakeholders and the new System Development Map is a good example of this. Over the last years it has become a reference.”*

ENTSOG and GIE are committed to further enhancing the information provided on the map in the future and welcome feedback from stakeholders.

The map is available for download at ENTSOG [website](#) GIE [website](#).

Should you require any further information please contact Celine Heidreheid (+32 2 894 5130, [celine.heidreheid@entsog.eu](mailto:celine.heidreheid@entsog.eu)).

### Editorial notes

- > ENTSOG was founded on 1 December 2009 in line with Regulation (EC) 715/2009. The current number of Members, Associated Partners and Observers can be found [at this link](#).
- > In line with Articles 6, 7 and 8 of the Regulation (EC) 715/2009, ENTSOG has the task of formulating network codes in a number of areas and of adopting various communications: a non-binding community-wide Ten-Year Network Development Plan on biennial basis; Winter and Summer Supply Outlooks; common network operation tools; recommendations relating to the coordination of technical cooperation between community and third-country-TSOs; annual work programmes and annual reports.
