

European Network of Transmission System Operators for Gas (ENTSOG) publishes recommendation paper on issues related to bundling of capacities

(Brussels 03 August 2015, PR0093-15) **ENTSOG publishes a recommendation paper on issues related to bundling of capacities based on an intensive dialogue with stakeholders about the outlined issues which were presented jointly with EFET at the XXVII Madrid Forum in April 2015.**

As follow-up to the XXVII Madrid Forum in April 2015, ENTSOG invited all interested stakeholders to two Public Workshops to discuss the identified issues related to the introduction of bundling of capacities and the potential options. The two Public Workshops took place on 20 May 2015 and 30 June 2015 in Brussels. In addition ENTSOG organised 3 preparatory meetings with stakeholder's experts in order to pre-discuss the content of both workshops and solutions to be proposed.

The aim of the first workshop was to focus on presentation of identified issues and initial options identified by ENTSOG and EFET and to discuss preferred ways forward and considerations of stakeholders, regulators and EC. On the second workshop ENTSOG presented options to address the issues and asked for stakeholder's support on the options to solve the identified issues.

ENTSOG reached stakeholder's support for potential options on the second stakeholder workshop. As the result of the first functionality cycle ENTSOG publishes recommendations how the identified issues may be solved. ([Link](#))

Editorial notes

- > ENTSOG was founded on 1 December 2009 in line with Regulation (EC) 715/2009. The current number of Members, Associated Partners and Observers can be found [at this link](#).
- > In line with Articles 6, 7 and 8 of the Regulation (EC) 715/2009, ENTSOG has the task of formulating network codes in a number of areas and of adopting various communications: a non-binding community-wide Ten-Year Network Development Plan on biennial basis; Winter

and Summer Supply Outlooks; common network operation tools; recommendations relating to the coordination of technical cooperation between community and third-country-TSOs; annual work programmes and annual reports.
