

Press Release

European Network of Transmission System Operators for Gas (ENTSOG) launches its Annual Report 2014

(Brussels, 1 June 2015, PR0085-15) 2014 was indeed a very demanding year for ENTSOG. The work in 2014 commenced with preparations for the tariff network code (TAR NC) and for the first amendment to the capacity allocation mechanisms network code (CAM NC). The newly published Annual Report 2014 provides all the necessary details for interested.

TAR NC was truly one of the most difficult topics ENTSOG has been confronted with. Nonetheless, ENTSOG was still able to achieve a sufficient support for its work on this network code.

While preparing a new version of the Ten Year Network Development Plan (TYNDP), the crisis between Ukraine and Russia began to escalate and ENTSOG was called upon in an advisory capacity by the European Commission. Stephan Kamphues, ENTSOG President, said, *“Here we helped by assessing various European gas market scenarios that could result from long term disruption to the Russian gas supply. ENTSOG provided a leading advisory voice on this issue and utilised some of their own specially developed tools.”*

The Annual Report 2014 is available [here](#).
