

FUNC issue on timing and comparability of day-ahead auctions by GM&T

Solution presentation

Irina Fix, Andreas Martens

Agenda

- **Introduction**
- **Issue presentation by Gazprom Marketing and Trading (Jan Niklas Gibbert)**
- **Issue solution description (ENTSOG)**
 - **Fallback process examples**
 - **Henrik Schultz-Brunn (Thyssengas GmbH)**
 - **Christian Ungerböck (Gas Connect Austria)**
- **Q&A session**

FUNC issue overview

- **Who raised: Gazprom Marketing and Trading**
- **Issue subject:** Capacity booking issues regarding timing and comparability of day-ahead auctions
- **Abstract:** The short 30-minute time window for the day-ahead (DAH) auction does not always allow for issues to be solved by the end of the auction window.
- As a result the DAH auction fails which leads to market participants not being able to balance their positions and the next opportunity to buy a full 24 hour product is the next within-day (WID) capacity auction. However, the WID products are not always like-for-like DAH products.

Solution

- Discussions, Telcos to better understand the issue and to create a possible solution
- TSOs also reviewed or established their fallback processes
- Creation of a clear structured table with parameters to describe the fallback-process and responsibilities in case of an auction failure for each TSO
- This template with fallback-processes of every TSO should be available on the respective **booking platform** where the TSO is active
- The overview of the fall-back processes will be published on ENTSOGs website (and linked on booking platforms and/or TSO websites) to keep the maintenance of the document easier and consistent

Update of published monthly auction(s) at multiple network points of Snam RETE GAS s.p.a., Enagas Transporte S.A.U.

Publication: 12.12.2018 15:00

PRISMA platform advises upcoming unavailability for all published monthly auctions on 13.12.2018 from 11:00 to 13:00 CE(S)T for updating marketable capacity at multiple network points of Snam RETE GAS s.p.a., Enagas Transporte S.A.U. The update affects bundled and unbundled auctions. Any previously-placed comfort bids for the updated auctions will not be transferred. Shippers who want to use the comfort bid functionality are requested to re-create comfort bids. This also affects comfort bids placed for auctions for the bundling partners at the affected network points.

Urgent Market Messages

Upcoming downtime 13.12.2018 02:55 – 04:05 CE(S)T (01:10h)

Publication: 11.12.2018 16:20

PRISMA platform advises upcoming downtime on 13.12.2018 from 02:55 to 04:05 CE(S)T for urgent maintenance. Due to urgent maintenance, the PRISMA platform will not be available. It will not be possible to surrender capacity, book capacity via FCFS, or trade in the secondary market during this timeframe. Any Trade Proposal, Response to a Trade Proposal or Trade that expires during the downtime will not be restarted when the platform is available again. All Within-Day auctions which should start on 13.12.2018 at 03:00 and 04:00 CE(S)T will be skipped and not repeated.

Extraordinary deployment on 10.12.2018 08:05 – 08:20 CET (POSTPONED)

Publication: 06.12.2018 17:27

(PRISMA is announcing an upcoming deployment to introduce a refactoring of the Within-day rollover mechanism on 10.12.2018 from 08:05 to 08:20 CET. As this deployment will be provided without a downtime, no effects on the Within-day auction starting at 08:00 CET are expected.) The deployment will be postponed.

Solution: Where to find on RBP?

The screenshot shows the RBP (Renewed Business Platform) website. The top navigation bar includes links for RBP, News and Events, UMM, Secure Area, Capacity Auctions, Buy-back auctions, Members and IPs, and Useful Information. The Useful Information dropdown menu is open, showing options like Auction Reports, Electronic Certificates, Webservice documentation, TSO Contracts and Fall-back, CAM NC, and Tutorial. The main content area is titled 'NEWS & EVENTS' and features several news items:

- General TSO Announcement – Gas Connect Austria GmbH** (13/11/2018): On behalf of Gas Connect Austria GmbH (GCA), we would like to draw your kind attention to the mandatory user registration process of GCA's capacity auctions by single users (natural persons) of a Network User. Every single user is required to proceed with the its registration request directly at GCA as described under following link ("Activation of the Authorised User"): <https://www.gasconnect.at/en/network-access/transmission-network/registration/>. For further details, please contact Mr. Herbert Gangl, e-mail herbert.gangl@gasconnect.at, directly.
- New RBP started - Old RBP in read-only mode** (01/10/2018): The new RBP started up on 1 October 2018. You can access it under: <https://ipnew.fgsz.hu/Fgsz.Klp.Web/>. The new RBP Portal is accessible under <https://ipnew.rbp.eu/RBP.eu/#news-and-events>. We would like to inform you that no business transactions take place any more in the old RBP system and no new data is published in the old RBP Portal.
- Welcome to the Renewed RBP Application** (30/09/2018): From 1st October 2018 the RBP.eu website and the RBP web application have been renewed.
- Change of RBP web address due to new RBP Application & User Registration Required** (24/09/2018): RBP, Trading Platform and FGSZ's new Information Platform will change its web address from 1 October 2018 as follows.
RBP: <https://ipnew.fgsz.hu/Fgsz.Klp.Web/>
FGSZ Information Platform: <https://ipnew.fgsz.hu/Fgsz.Ip.Web>
FGSZ Trading Platform: <https://ipnew.fgsz.hu/Fgsz.Kp.Web>
In case of RBP, the web address change is temporary and the usual address will be restored in due time. Reminder: Registration by the users to the new platform is required to be able to continue business activities from 1 October 2018! For more information, please read further.
