

# Publication relevant point-data

## ENTSOE 14th Transparency workshop

Ruud van der Meer

# History of data publication

## Publication on GTS-web-site

- GTS started publication of numerical data before Regulation 715/2009
  - Definition and format of data-items defined by GTS
- Transparency requirements from Dutch Transmission conditions agreed with NRA
- Requirements from regulation 715/2009
  - Strong overlap with national requirements
  - Slightly different definition of some data-items

## Consequences of introduction ENTSOG TP

- Added value of a central European platform – ENTSOG-TP
  - One-stop shop for transmission data in the EU
  - Uniform data-formats
  - API to retrieve data
- Publication on GTS-website and ENTSOG-TP
  - Most information published twice
  - Definition of specific data-items differed between the platforms
  - Questions on perceived inconsistencies
  - Operational and maintenance effort on two data channels
- GTS decided to reduce transparency publication on its website

## Reducing transparency publication on GTS-website

- Data was published both on ENTSOG-TP and GTS-website
- No concerns raised by user of GTS-website
  - Data still available
  - Link to ENTSOG-TP
- Reduce complexity and costs for GTS
  - Gradually removed reports from GTS-website
  - Publishing link to ENTSOG-TP on GTS-website
  - Specific Dutch requirements continued at GTS-website
  - In line with transparency guideline annexed to Reg. 715/2009
- Currently only
  - Interruption data
  - Information on transfer of capacity
