We are satisfied with the degree of openness showed by ENTSOG in the past and we trust that the same is true in the future. We believe that the proposed project has provided a sound basis for quality stakeholders involvement, provided that ENTSOG will remain open to other stakeholders that go beyond the format and official gatherings.

It seems questionable to differ to the comitology process the issue of capacity calculation, which would not select the case. Thus we do not think that ENTSOG has a good practice and should be maintained, equally the use of webinars, as well as teleconferencing, allow us to attend meetings and discussions.

The above response is true.

You can have any other comments or observations regarding the proposed indicator if you consider it necessary.

No.
