

Press Release

European Network of Transmission System Operators for Gas (ENTSOG) launches its Annual Report 2012

In 2012, ENTSOG has achieved much for Transmission System Operators (TSOs) and industry stakeholders. To mention a few of its accomplishments: the organization finalized the TYNDP, the CAM Network Code, established a dialog between TSOs and ACER in the framework of the CAM Early Implementation Roadmap and, together with GIE, finalized the production of the System Development maps.

Stephan Kamphues, ENTSOG President, said, *“Despite these considerable achievements, we don’t intend to rest on our laurels. There’s still much work to be done. Luckily, we can rely on good relationships with our stakeholders and a fruitful collaboration with all of them. That is the best guarantee to successfully complete the important tasks ahead.”*

The Annual Report 2012 is available at:

If you require any further information, please contact Armin Teichert (+32 2 894 5140, armin.teichert@entsog.eu).

Editorial notes

- > ENTSOG was founded on 1 December 2009 in line with Regulation (EC) 715/2009. It currently comprises 42 members and three Associated Partners from 25 EU countries, and four Observers from four non-EU countries.
- > In line with Articles 6, 7 and 8 of the Regulation (EC) 715/2009, ENTSOG has the task of formulating network codes in a number of areas and of adopting various communications: a non-binding community-wide Ten-Year Network Development Plan on biennial basis; Winter and Summer Supply Outlooks; common network operation tools; recommendations relating to the coordination of technical cooperation between community and third-country-TSOs; annual work programmes and annual reports.
