

Press Release

European Network of Transmission System Operators for Gas publishes the System Development Map 2013 in cooperation with Gas Infrastructure Europe.

(Brussels, 12 November 2014, PR076-14) The European Network of Transmission System Operators for Gas (ENTSOG), in cooperation with Gas Infrastructure Europe (GIE), has published the fourth edition of the map illustrating the development of gas supply, demand and infrastructure over 2013 and the first quarter of 2014.

Based on feedback received on the previous editions, the new map covers additional information such as the daily profile of supply. Graphical layout has also been improved in order to bring more clarity to the information.

Vittorio Musazzi, ENTSOG General Manager, said, *“The System Development Map, like the Seasonal Reviews, inform about the last supply and demand trends. I hope that this fourth edition will continue to be useful to the market and institutions for their analysis.”*

Thierry Deschuyteneer, GIE Executive Secretary, said: *“Infrastructure operators are committed to offer useful information to stakeholders and the new System Development Map is a good example of this. Over the last years it has become a reference.”*

ENTSOG and GIE are committed to further enhancing the information provided on the map in the future and welcome feedback from stakeholders.

The map is available for download at ENTSOG <http://www.entsog.eu/maps/system-development-map/2013> and GIE <http://www.gie.eu/index.php/maps-data/system-development-map>.

Should you require any further information please contact Olivier Lebois (+32 2 894 5105, olivier.lebois@entsog.eu).
